

Curriculum Vitae

Tomasz Burzykowski

Tomasz Burzykowski has been working as Research Professor of Biostatistics/Bioinformatics at the Center for Statistics of Hasselt University since 2002. He held a visiting professorship position at the Department of Medical Epidemiology and Biostatistics at the Karolinska Institute (Sweden). In 2009, he joined IDDI as Director of Research. Tomasz has published methodological papers on topics like surrogate endpoint validation, meta-analysis, missing data, and survival analysis. He has also published articles on applications of statistics in various areas of clinical medicine including oncology, dermatology, or orthodontics. He has been involved in interdisciplinary research in numerous biomedical studies and clinical trials. He serves as Associate Editor for *Biometrics*.
